SUMMARY

Conversation designer with nearly 5 years in digital product design and 4+ years designing AI assistants and voice experiences for Fortune 500 customer support. I design LLM-powered conversations that are clear, trustworthy, and inclusive, drawing on a background in behavioral psychology. Bilingual in English and Spanish.

EXPERIENCE

Conversation Designer, Waterfield Tech

April 2022 – Present

- Design end-to-end conversational experiences for AI assistants and voice agents supporting customer service for Fortune 500 clients, including healthcare, from requirements through launch
- Write and iterate on prompts and agent instructions for LLM-powered assistants, shaping tone, scope, and behavior
- Evaluate LLM responses for accuracy, task completion, and appropriate behavior, using findings to refine prompts and conversation design
- Design clarification, error recovery, and escalation patterns so assistants communicate their limits clearly and hand off smoothly to live agents
- Architect multi-turn dialogues and information structure for voice and chat, mapping intents, entities, and flows across channels
- Partner with linguists, data operations, and machine learning teams to collect, curate, and annotate training data
- Apply speech science and behavioral psychology to design inclusive conversations for users with special needs
- Present conversation design concepts to six Fortune 500 companies, translating AI capabilities into clear recommendations that build alignment
- Onboarded 3 new designers and led peer critiques on conversation flows
- Own all Spanish-language content, providing native-level translation to expand audience reach

UX Researcher & Writer, Actually (Ours)

November 2021 – March 2022

- Designed user flows and prototypes that increased user engagement by 37%
- Conducted heuristic and competitive analyses to identify user pain points
- Gathered secondary research on mental health and interviewed field specialists to define in-app content
- Created high-fidelity components in Figma to support UI development

Behavior Therapist, Happy Learner's Academy

January 2019 – July 2021

- Provided one-on-one behavioral support to children with autism across school, home, and clinic settings
- Collected qualitative and quantitative behavioral data and distilled findings into clear updates for case managers and families
- De-escalated challenging behavior while ensuring child safety

Statistics Tutor, Matador Achievement Center

January 2017 – May 2018

- Mentored student-athletes in statistics, research methods, and writing, adapting explanations to each student's learning style and translating complex concepts into clear, practical steps
- Built individual improvement plans by identifying skill gaps and connecting students to resources, while following NCAA academic regulations
- Coached students on professional communication, organization, and time management

EDUCATION

B.A. Psychology, cum laude, California State University, Northridge

May 2018

UX Design Certificate, General Assembly

August 2021

SKILLS

Conversation & AI: LLM prompt design, AI behavior design, conversation evaluation, dialogue architecture, IVR and chatbot design, NLU/NLP, voice and tone

UX & Research: Interaction design, information architecture, usability testing, user interviews, heuristic evaluation, prototyping

Tools: Genesys, Google Dialogflow, Voiceflow, Cyara, Figma, Sketch, Webflow, Miro, LucidChart, Jira, SQL, Python

Languages: English and Spanish (native)
